

Antenna Networking for Progress, Not for Profit!

Dear friends,

Nijmegen, 5 February 2010,

From the environmental perspective and for aspects of efficiency we will be sending the next invoice to you via e-mail. Hence we need from you the address via which you will be receiving our montly invoices. Please fill in this address via <http://www.antenna.nl/invoice.html>

There are also some other important news items we like to share with you:

- Since several months our team has been enhanced with an extra Drupal programmer Last year we received several webportal projects like for Waste, BMF and the Royal Association for Nature and History (KNNV). For these kind of umbrella sites usually the Open Source CMS **Drupal** is being used like for example also used for Amnesty International, Human Rights Watch and the Whitehouse. See our homepage for some links to these projects and sites on Drupal.
- Next to Drupal we use **Wordpress** as Open Source CMS for the more compact sites. There are many plugins and modules available. Your own CMS installlation with Wordpress, with two extra modules and a choice of thousands of designs costs only € 500 Euro incl. VAT (MOMS) plus an annual hosting fee of € 59.95. Drupal and Wordpress sites will be upgraded and maintained by Antenna without extra costs.
- We are going to offer users of Cobra CMS cheap conversion options to these CMS.
- Of course we also have built **webshops** like <http://www.spirulina.org> using Open Source like **Magento**, Übercart and WP E-commerce. Several users use these webshops or payment modules for PayPal (credit cards) for membership fees.
- Since July 1 2009 the included Internettraffic for a website for almost all categories of websites was expanded **five times**. And additional Internettraffic came down in price from € 4.50 to only € 1.00 Euro per Gb. We were able to acquire it more cheaply.
- From january 1 onwards the **included webspace** for websites has mostly **doubled!** Again an expansion of your website options without additional surcharges!
- With the next invoice we will keep you update on new developments and services. We have expanded our services and noticed many users are not aware of all of them.
- Like the Cobra Newsletter module that can be mailed individually to your mailinglists using HTML, pictures and your own design, costs only € 395 plus € 8,25 per month.
- Or your own closed **Intranet** on the Internet using **Open Atrium** which includes forming groups, taskmanagment, blogs, chatbox, document maintenance and cooperation, version control, workflow management for € 95 and monthly for example for 10 persons only € 9,95. See our homepage for a link to some screen samples.
- Antenna uses since 1997 **natural energy resources** based on sun, water and wind. Since 2009 we also use a new german location solely powered by waterenergy.
- In 2011 we will celebrate our **quarter century** anniversary. We will start this year with a new design and website, made by a well known designer. The design is ready and the programmers team will start to built it into our CMS coming Monday. We hope to launch the new site around the first of may. The current site was designed and built in 1993 and is only been maintained with news items and campaigns of our users.

Do not forget to pass on to us your e-mail address via <http://www.antenna.nl/invoice.html>
You need for that also the 16-digit invoice number from the enclosed invoice.

Best regards, venlig hilsen, viele Grüsse, Salutations,

Antenna Support Team
